

Fujitsu Training Center Westminster, CA

The Western Fujitsu Training Center is now open for business!

Our new training center has been furnished with every Fujitsu indoor evaporator on display as full working models. Plus, an open working model is available for troubleshooting training. The training center accommodates 12 people per class, but can fit 16 if necessary.

The units are set in "theme" rooms (restaurant, kitchen, classroom and office) so guests can visualize placement of Fujitsu units in their house or building. We also encourage contractors to invite prospective customers to the training center. Please contact your Fujitsu Distributor Representative to schedule time at the training center today!
