

New Products for 2009

North America's Most Efficient Mini-Split!

- Largest number of Energy Star® models
- Highest single SEER system, 25+ SEER
- Highest HSPF system, 12+ HSPF
- Highest overall SEER of any lineup
- Best value to SEER ratio
- 6% slimmer than prior indoor models
- Energy Star® Tier 2 qualified units
- Energy saving apple catechin and ion deodorization filters
- Less expensive than 13-SEER units with utility rebates, where available

Multi-Zone Flexibility Increases to 110 Systems

In 2009 we introduce compact ceiling cassettes in 9, 12 and 18,000 capacities. Just 11 components will create 110 combinations. The new compact cassette design will fit directly into a 2' x 2' drop ceiling grid without additional modification to the grid. These models provide zoning efficiency in commercial applications such as offices, restaurants, hospitals and schools. In homes where ceiling trusses are 24" or more on center we're able to install compact cassettes in retrofit applications. Framed into new construction also allows for compact cassettes to provide zoning without any duct loss.

	Non-Ducted	Ducted	Mixed
Dual Zone SEER	16.5	15.0	15.75
Dual Zone HSPF	9.0	8.6	8.8
Tri/Quad Zone SEER	15.0	14.0	14.5
Tri/Quad Zone HSPF	9.0	8.6	8.6
