

COURSE OVERVIEW

This one day regional class provides in-depth troubleshooting for Halcyon Inverter systems. Morning session provides thorough instruction on basic electric and how to use a multi-meter, as well as a complete teardown & rebuild of an indoor wall mount unit. Afternoon session provides instruction on inverter technology and DC components. The afternoon lab includes board level diagnostics and hands on testing of outdoor unit circuit boards with multi-meters.

Students need to bring a digital multi-meter with fresh batteries to the class. (Meters are not provided) *Multi-meter should be capable of specific component testing; this includes the diode check function and a 4-10 mega-ohm testing capability.*

COURSE LOCATION AND DETAILS

Date: See your Fujitsu Toolbox for upcoming dates

Time: 8:00 a.m. – 3:00 p.m.

Location: TRC Sales, Inc.
11258 Monarch St. Suite M
Garden Grove, Ca. 90720

Phone: 714/379-4994
