

FUJITSU Tech 101

Date:

7:30 am – 3:00 pm

Company Name

Address

How Do I Register?

- Go to www.fujitsugeneral.com
- Click on “CONTRACTOR TOOLBOX LOGIN”
- Log in to your Fujitsu Toolbox or “Sign Up to Create Account”
- Click on “Training Signup” and Select the class to sign up for.

Course Highlights:

- Class goal is to assist technicians and installers who work with minisplit systems to be more familiar with installation and application differences from traditional unitary systems, without boring them to death with sales jargon and promotion.
- Course provides a great technical overview of Fujitsu’s Halcyon products. It provides a more technical perspective than the FAST class, while complimenting it with application ideas, pictures, installation hints, tips and requirements. Troubleshooting sections offer excellent guidance for system and component troubleshooting. The course is comprised of 6 modules. Most can be instructed in just over an hour providing perfect timing for breaks. This full day course helps ensure all participants receive the basics skills and knowledge to apply and support Fujitsu minisplit products.

Fujitsu Tech 101 course provides new information and content not found in previous training materials.

What can you expect from Fujitsu Tech 101?

- Great information for products and service
- Earn points on the Fujitsu Portal
- A factory trained and authorized instructor
- Class Handouts and Training Certificate
- NATE 8 hour credits (must bring NATE ID # to class)

Breakfast and sign-in is at 7:30am. Class begins at 8:00am. Registration is only available online. Please register **in advance**. Substitutions are allowed. For questions, contact: **CONTACT INFO HERE**.
