

COURSE OVERVIEW

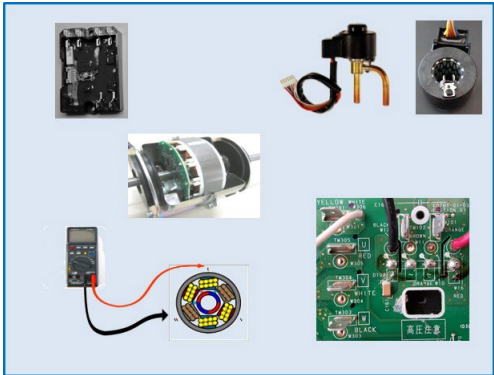

Pre-requisite: Attended Fujitsu FAST or Fujitsu Tech 101 class prior to attending.

This is a one-day regional class providing in-depth troubleshooting for Halcyon Inverter systems. The class is an instructor-led, hands-on course held across the U.S. offering classroom style training on multi-meters, DC controls and circuits with diagnosis and testing of Fujitsu outdoor unit circuit boards. Students need to bring a digital multi-meter with fresh batteries to the class. **(Meters are not provided)**

Multi-meter should be capable of specific component testing; this includes the diode check function and a 4 to 10 mega-ohm testing capability.
